November 10, 2017

Dear Senators and Members of Congress:

On behalf of the national organizations listed above, which represent hundreds of thousands of members of the municipal bond issuer and user community and professionals who work for issuers, we write to express our opposition to provisions included in H.R. 1 and the Senate Finance Committee Chairman's Mark of the "Tax Cuts and Jobs Act" that eliminate financing tools utilized by State and local governments, schools, hospitals, airports, seaports and special districts and other public sector entities to provide critical investments in infrastructure and save taxpayer money.

Municipal bonds are a means to finance vital infrastructure used by state and local governments. As public issuers, we have grave concern over the bond provisions in H.R. 1 and the Senate Finance Committee Chairman's Mark, more specifically: (1) the repeal of the ability to advance refund municipal bonds; and (2) the termination of the ability to use private activity bonds (PABs).

The ability to advance refund outstanding bonds provides substantial savings to taxpayers throughout the country. Under current law, governmental bonds and 501(c)(3) bonds are permitted one opportunity to refinance at lower rates outside the 90-day period before the bonds come due. This allows public issuers to take advantage of fluctuations in interest rates to realize considerable savings on debt service, which ultimately benefits taxpayers. In 2016, the advance refunding of more than \$120 billion of municipal securities saved taxpayers at least \$3 billion. GFOA best practices recommend minimum savings thresholds on a present value basis of 3-5 percent when advance refunding municipal securities.

PABs are widely used for infrastructure projects with a distinct public purpose such as airport and seaport projects, affordable housing, nonprofit health, and education facilities, all of which contribute to vibrant local communities. In 2016, over \$72 billion in PABs used largely by nonprofit hospitals and universities were issued, and in the same year over \$12 billion were issued to support airports, housing, and rural public cooperatives. By eliminating PABs, the federal government limits flexibility for states and local governments to use their best combination of public financing methods available to deliver vital projects that provide essential public services.

For these reasons, we urge you to oppose provisions in any final tax reform package that would repeal the ability to advance refund municipal bonds or repeal issuers' ability to use private activity bonds.

## Sincerely,
