

NABL

DATA STANDARDS & THE
FINANCIAL DATA
TRANSPARENCY ACT (FDTA)

MARCH 2023

xBRL | US

XBRL US

- XBRL US – nonprofit standards organization
 - Developed data standards for:
 - Securities and Exchange Commission (SEC)
 - Federal Energy Regulatory Commission (FERC)
 - Membership organization (accounting firms, other nonprofits, data analytics companies, software providers and filing agents)

Defining Data Standards

Standards improve efficiency of an existing process

Data standards improve the creation, reporting and use of data through automation

XBRL (eXtensible Business Reporting Language)

- Creates machine-readable:
 - Financial data (monetary, percent, integers)
 - Narrative (text and text block)
- Is open and nonproprietary (free)
- Developed and maintained by global nonprofit (XBRL International)

Defining Data Standards

Data standards *are not* accounting standards (e.g., GASB, FASB, IFRS)

Data standards are *not* products or formats (like CSV, JSON, XML, HTML)

Data standards can be created to adapt to all different types of governments, e.g., general purpose or special district, allowing them to report *as they do today*

Open, nonproprietary data standards allow *many* options for report preparation because any accounting system or reporting software can be adapted to open (free) data standards

- Open, non-proprietary data standards: XBRL, FIGI, LEI
- **Non-open, proprietary** data standards: CUSIP, DUNs number

Financial Data Transparency Act (FDTA)

- Signed into law Dec 23, 2022, as part of H.R. 7776, the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023
- Calls for use of data standards by member agencies of the Financial Stability Oversight Council (FSOC): U.S. Treasury, the Securities and Exchange Commission (SEC), the Federal Deposit Insurance Corporation (FDIC), the Office of the Comptroller of the Currency (OCC), the Bureau of Consumer Financial Protection (CFPB), the Federal Reserve System, the National Credit Union Administration (NCUA), and the Federal Housing Finance Agency (FHFA).
- Section 5823 calls for data transparency relating to municipal securities, to be implemented by the SEC

Financial Data Transparency Act (FDTA)

Data standards are defined as:

- Including common identifiers
- Open and nonproprietary
- Able to render data searchable and machine-readable
- Financial reporting requirements documented in machine-readable taxonomies
- Incorporate standards developed and maintained by voluntary consensus standards bodies
- Consistent with applicable accounting and reporting principles

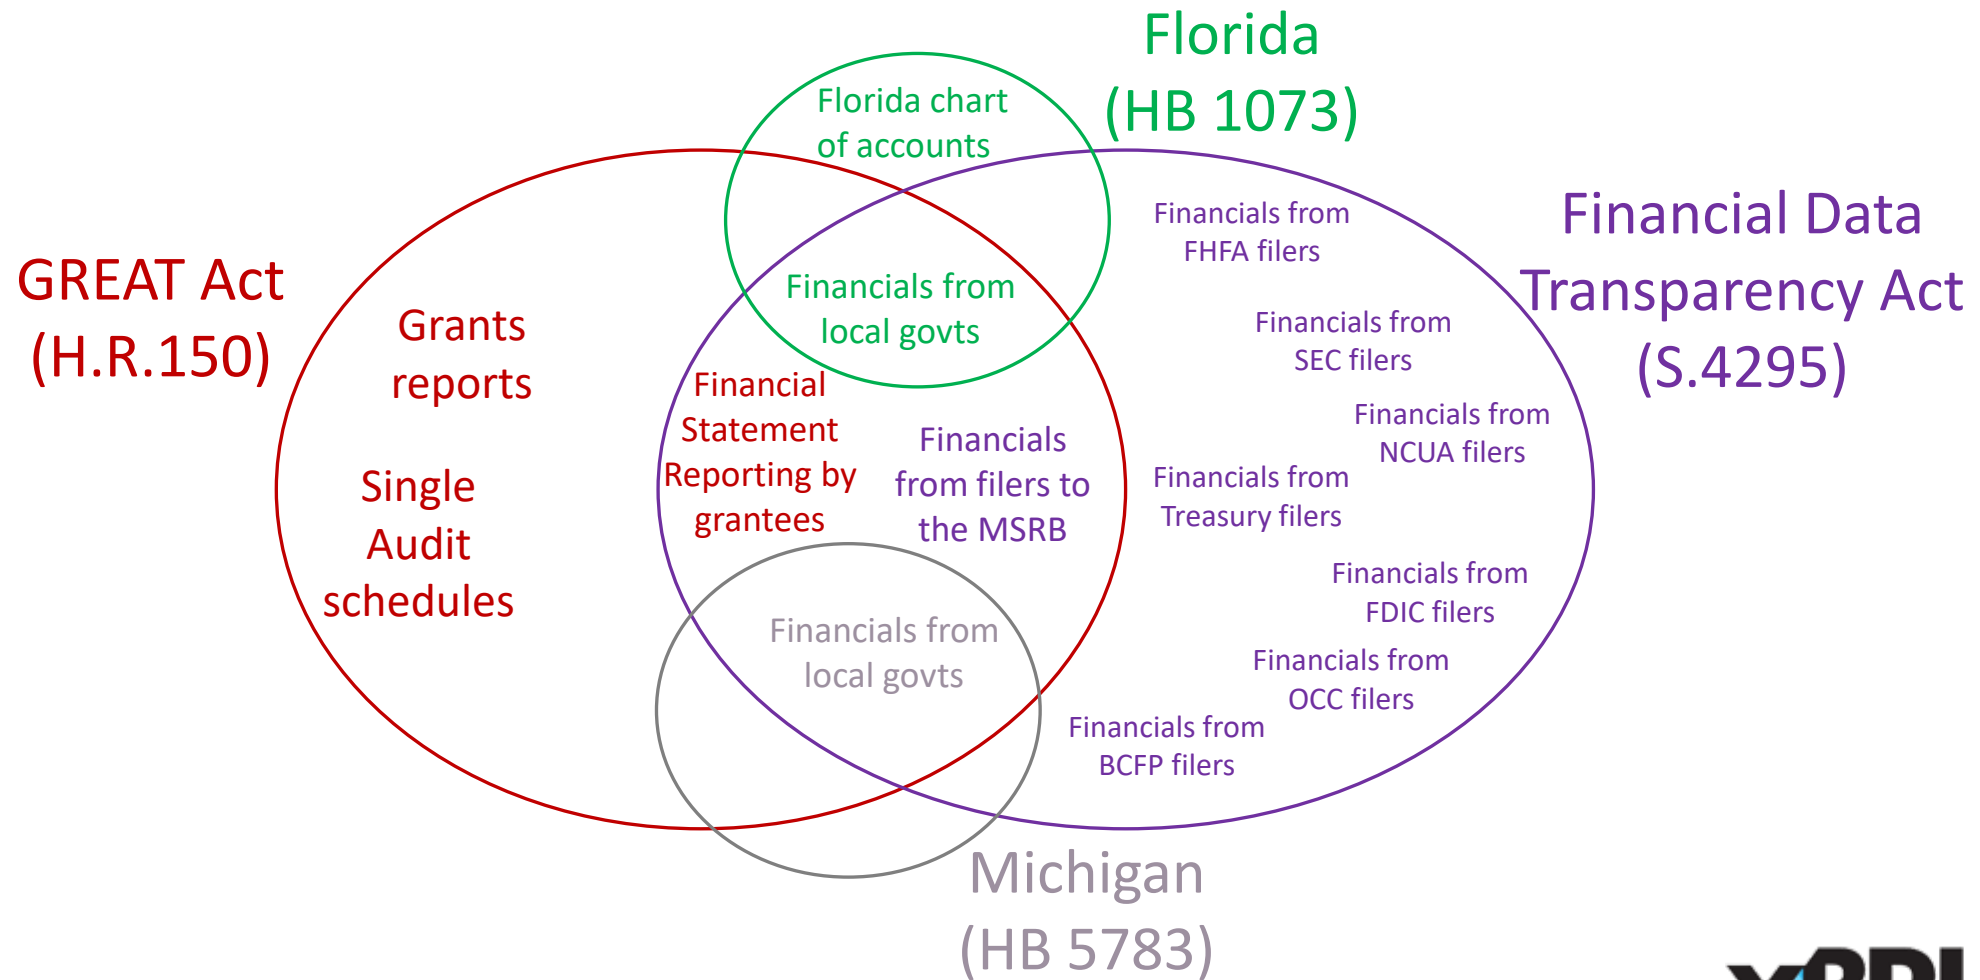

Timing

- 18 months after enactment, heads of covered agencies shall jointly issue proposed rules for public comment to establish data standards
- 2 years after enactment, jointly promulgate final rules for data standards
- Data standards established shall take effect not later than 2 years after which final rules are promulgated

Impact on local governments

- Governments with outstanding municipal securities will need to comply with the FDTA
- There is no change in what governments are required to disclose. Governments will not be required to submit data in a standard template
- There *will* be a change in how data reported to the Municipal Securities Rulemaking Board (MSRB) Electronic Municipal Markets Authority (EMMA) is formatted
- Other local governments *may* be affected because of the GREAT (Grants Reporting Efficiency and Transparency) Act
 - Requires data standards for grants reporting and Single Audit
 - Schedule of Expenditures of Federal Awards
 - Schedule of Findings and Questioned Cost
 - Financial statements
 - Delayed implementation

SECURITIES AND EXCHANGE COMMISSION

(Release No. 34-59061; File No. SR-MSRB-2008-05)

December 5, 2008

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1 Thereto, Relating to the Establishment of a Continuing Disclosure Service of the Electronic Municipal Market Access System (EMMA)

I. Introduction

On July 29, 2008, the Municipal Securities Rulemaking Board (“MSRB” or “Board”), filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² a proposed rule change to establish a continuing disclosure service (the “continuing disclosure service”) of the MSRB’s Electronic Municipal Market Access system (“EMMA”). The proposed rule change was published for comment in the Federal Register on August 7, 2008.³

20

Some commenters that supported the proposed rule change suggested incorporation of an interactive data standard (i.e., XBRL).⁶⁸ The MSRB responded that it will take all such suggestions under consideration for future revisions to the continuing disclosure service. The MSRB noted, however, that documents need not be created in any particular manner in order to be saved or scanned into a PDF format. The MSRB indicated that it does not view establishing XBRL as a data standard for EMMA submissions as appropriate at this time, although it noted that it continues to be interested in working with the municipal market in the future on interactive data initiatives. The Commission believes that, in the future, access to continuing disclosure documents through the EMMA system could be enhanced by improved methods for the electronic presentation of information, but believes that the MSRB’s technology choices for EMMA are appropriate at this time.

Government data standards development

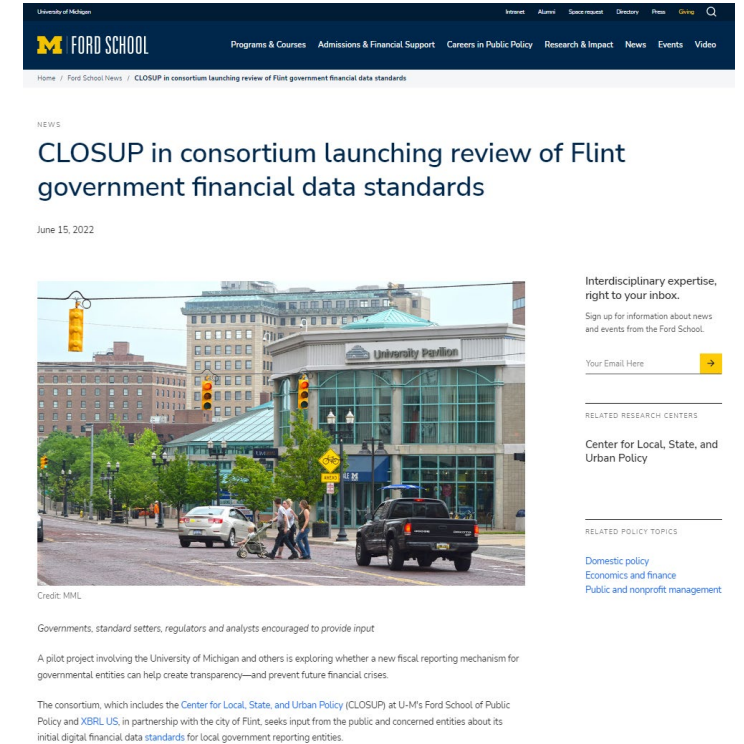

Established working group in 2018

Florida passed HB 1073 requiring machine-readable (XBRL) for local reporting

Developed 3 draft releases of Annual Comprehensive Financial Reporting (ACFR) Taxonomy

Partnered with University of Michigan Center for Local State and Urban Policy (CLOSUP)

Michigan HB 5783 appropriated IT funding to explore machine-readable (XBRL) standards for local reporting

Governments, standard setters, regulators and analysts encouraged to provide input

A pilot project involving the University of Michigan and others is exploring whether a new fiscal reporting mechanism for governmental entities can help create transparency—and prevent future financial crises.

The consortium, which includes the [Center for Local, State, and Urban Policy \(CLOSUP\)](#) at U-M's Ford School of Public Policy and [XBRL US](#), in partnership with the city of Flint, seeks input from the public and concerned entities about its initial digital financial data standards for local government reporting entities.

Government data standards development

- Reviewed thousands of Michigan ACFR statements/engaged public sector SME
- Incorporated Michigan-specific reports, conducted public review

Financial statements:

- Government-wide
 - Statement of Net Position
 - Statement of Activities
- Governmental Funds
 - Balance Sheet
 - Revenues, Expenditures and Changes in Fund Balance
- Proprietary Funds
 - Statement of Net Position
 - Revenues, Expenses and Changes in Fund Net Position
 - Statement of Cash Flows

Notes

- Pension
- OPEB
- Capital Assets
- Long-term Debt

Michigan-specific Forms

- Form F65
- Form 5572

Validation rules

- Required elements
- Mathematical relationships

Revenues from Federal Government,
Modified Accrual

Data Type = monetary

Fund Name = General Debt Service Fund

Fund Type = Debt Services

Period Type = duration

Balance = credit

Reporting Entity = City of NY

Where data standards are used

213 XBRL programs worldwide; US programs:

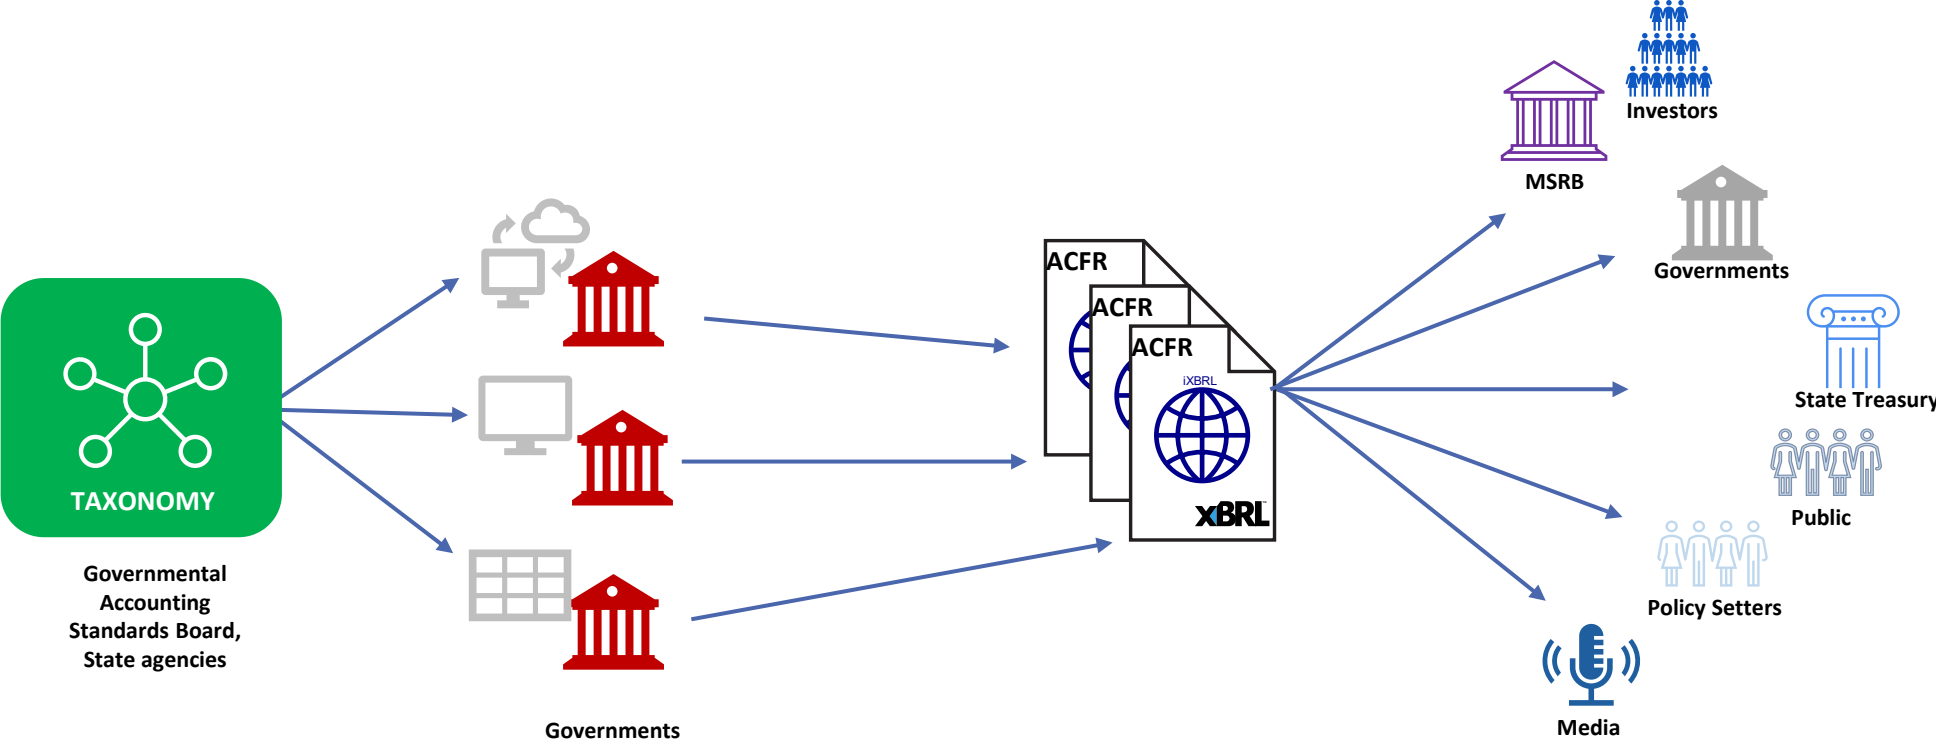

- Banks reporting to the FDIC (since 2005)
- Utilities reporting to the FERC (since 2021)
- Public companies and investment management companies reporting to the SEC (since 2009)

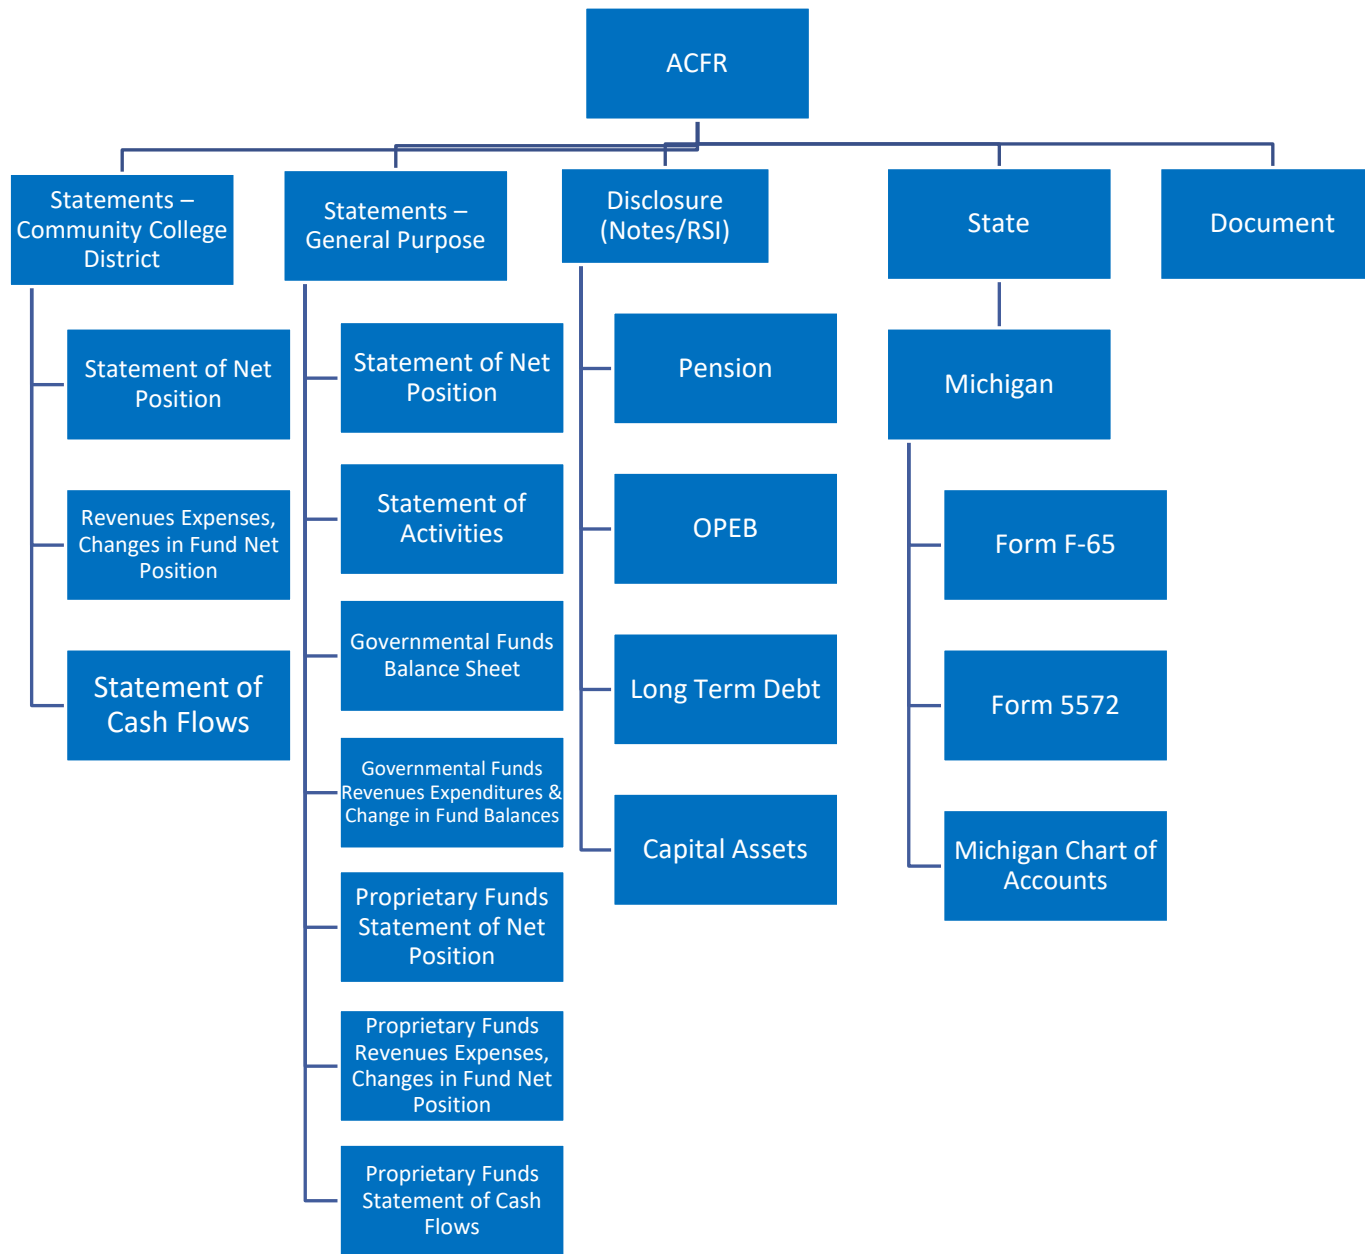

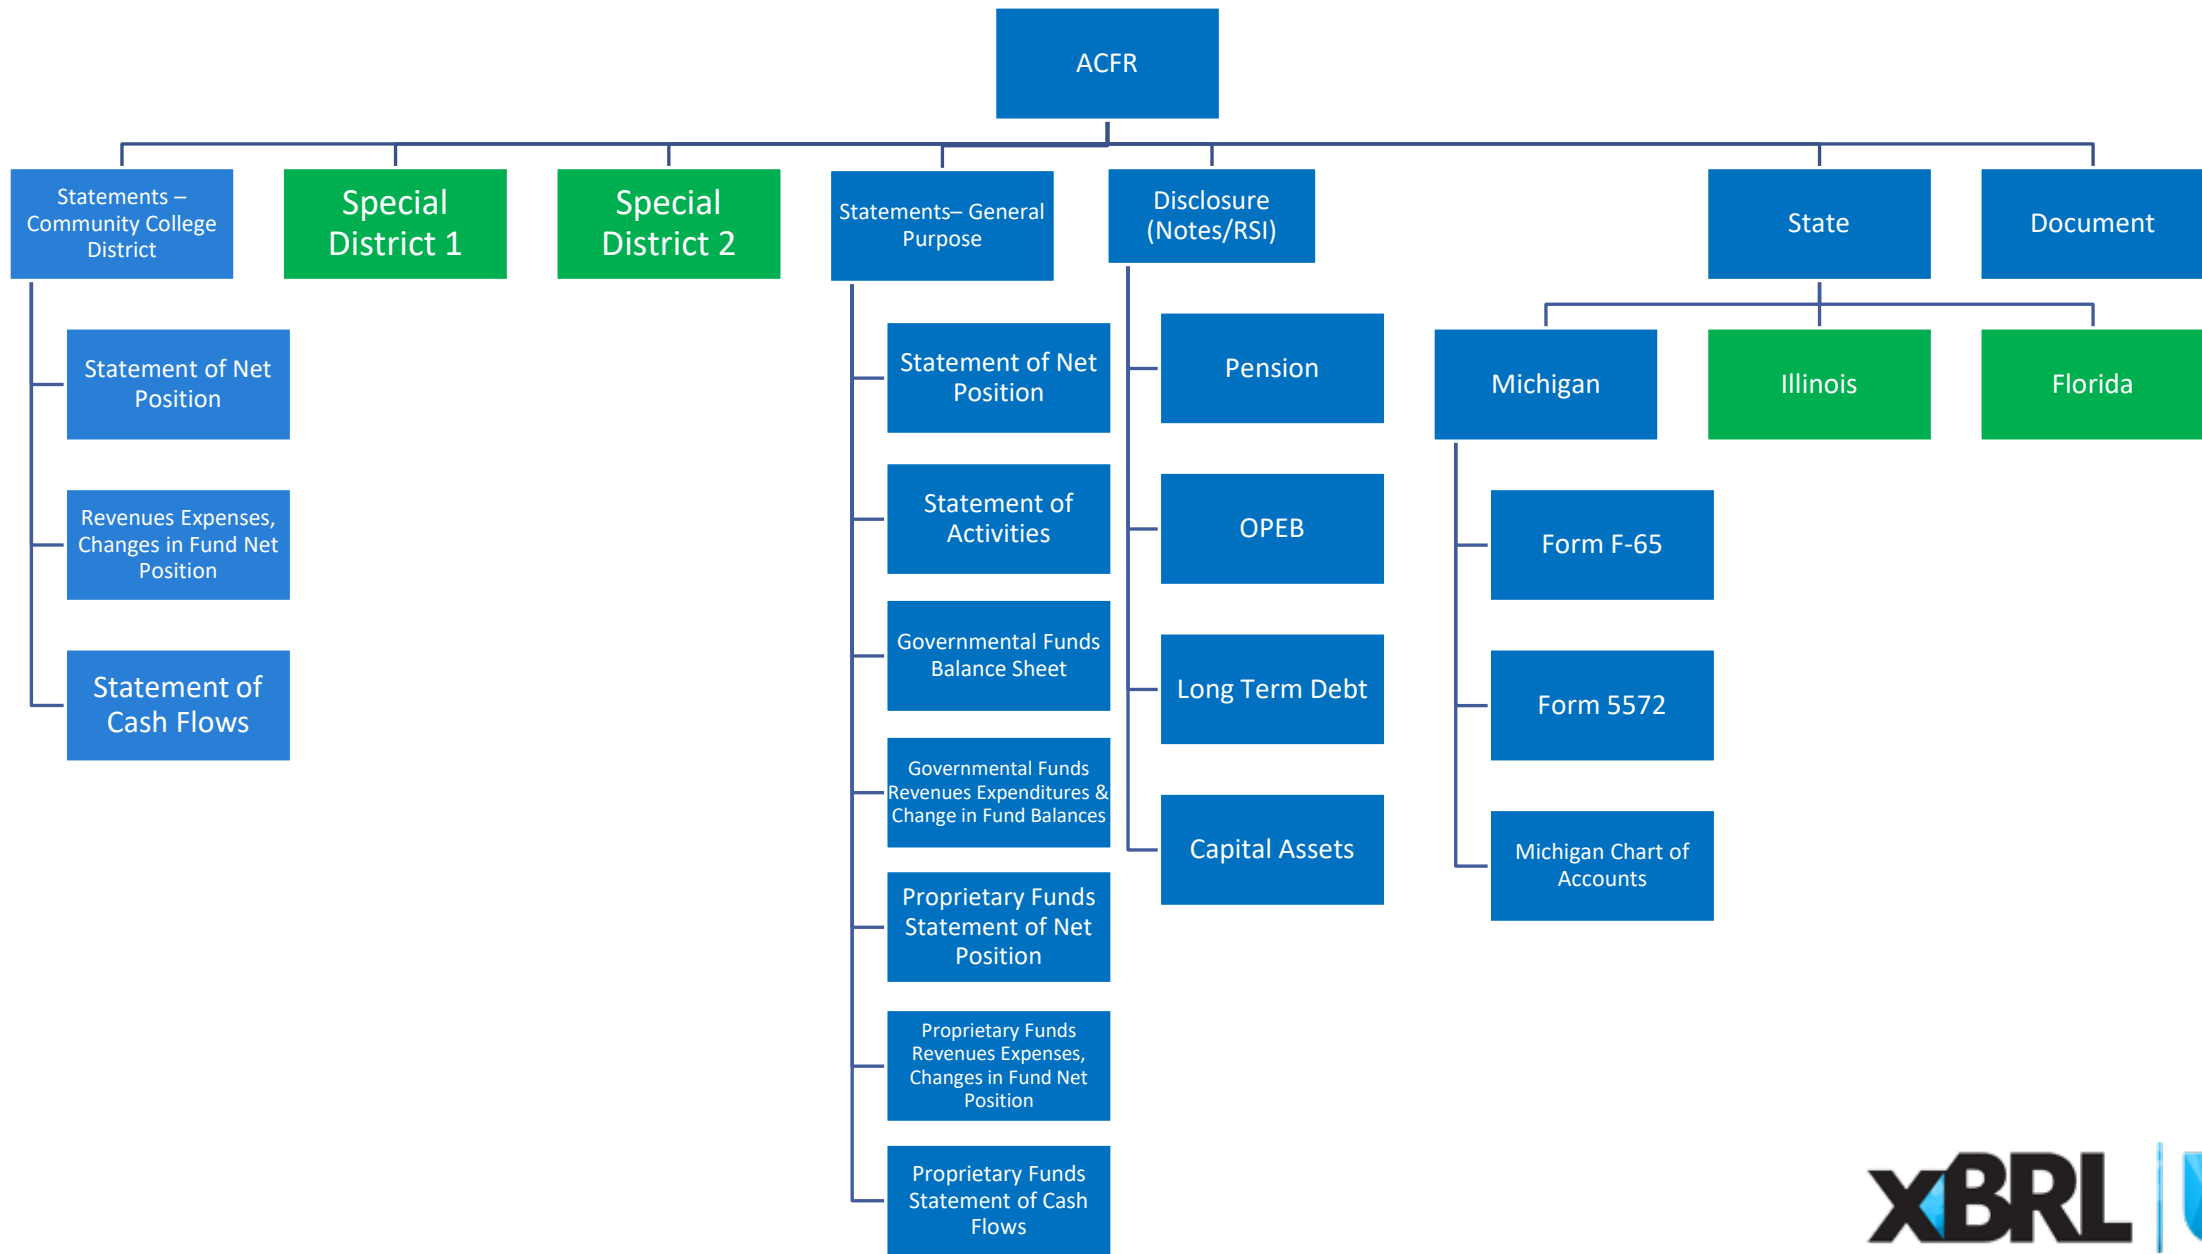

SEC reporting from public companies

Potential for government reporting

Need for flexibility

Supports different state requirements: state-specific references and concepts can be layered on top of GASB-specific line items.

Supports different types of governments: general purpose, special district, etc.

Allows for unique line items: custom line items not already in the taxonomy can be added.

Need for range of preparation options

Any software application can freely adapt to open data standards

Governments will be able to use:

- Full-service preparation and reporting applications
- Existing accounting system
- Spreadsheet-based applications

Range of costs:

- As low as \$500 to more depending on service and features
- No change to existing accounting systems
- Corporates with revenues <\$250 million average annual spend for 4 filings to the SEC was \$5,500

Conclusion

Government issuers with outstanding securities will need to comply.

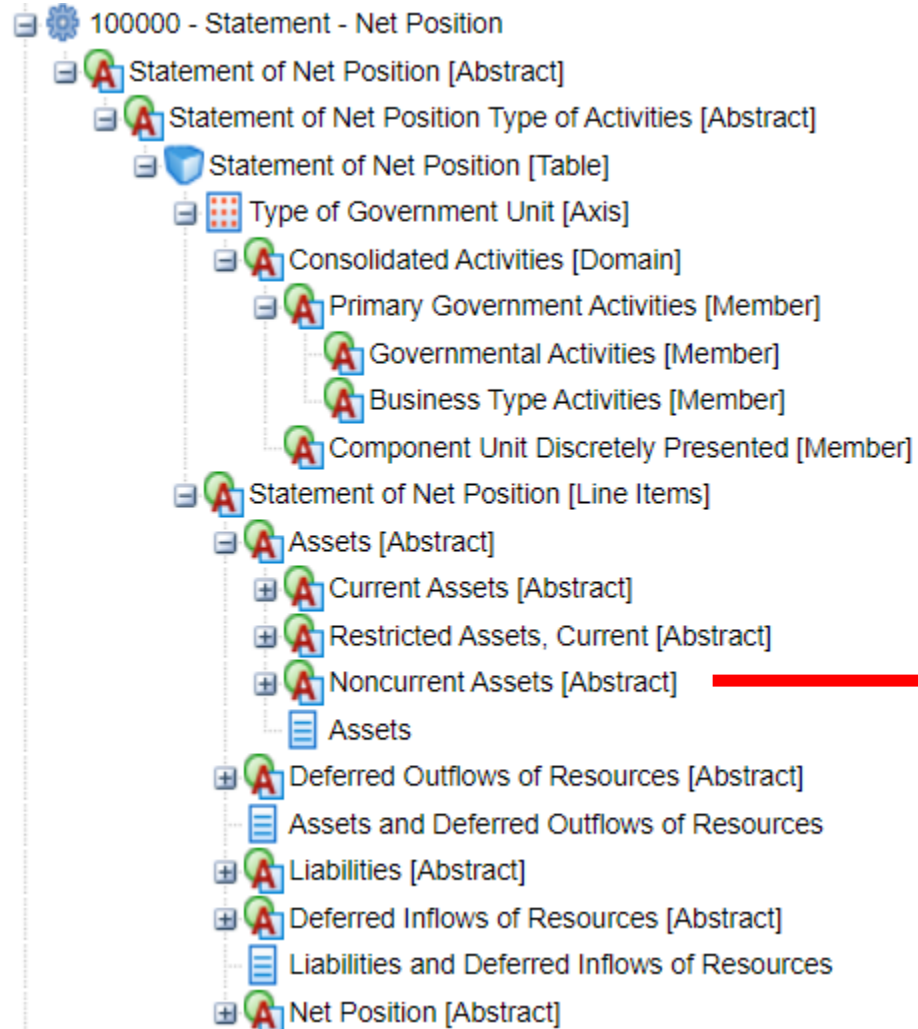

FDTA implementation for governments is likely to begin in 2027 or later.

SEC has a history of phasing in programs to ease burden.

Governments and other stakeholders will have the opportunity to weigh in on an SEC proposed rule.

Data standards programs have effectively improved efficiencies through automation worldwide.
